TECHNICAL SKILLS

Backend: Java, Kotlin, Go, Spring Boot, REST, SOAP, Microservices, Batch Processing

Frontend: React, Angular, JavaScript, TypeScript, Markdown-driven UI Architecture

Cloud / Serverless: AWS, Azure, AKS, OpenShift, Docker, Kubernetes

Architecture & Systems: Event-Driven Architectures, Distributed Systems, CI/CD, Developer Experience (DX) Tooling, RAG-based Knowledge Systems

AI / Automation: LLM Integration, Retrieval-Augmented Generation (RAG), KoboldCpp, Automation Anywhere, RHPAM,

Data: SQL, PL/SQL, T/SQL

Messaging: Kafka, Message Queue (IBM MQ)

Automation & Rules Engines: RHPAM, Automation Anywhere

WORK EXPERIENCE

SimplyGo Pte. Ltd. | Senior Software Engineer | Oct 2024 - Present

- Involvement in the whole SDLC of implementing new features and integration with various services from external stakeholders (CIMB, MyInfo, MPGS etc)
- Prototyping solutions for implementations and assisting in migration initiatives to Azure cloud services.
- Designed and developed “Simply Flow”, an internal developer portal focused on onboarding, production alert management, operational troubleshooting, and developer productivity workflows
- Built a React-based portal with markdown-driven architecture for dynamically rendering operational runbooks, onboarding guides, and production alert references
- Designed AI-assisted troubleshooting architecture integrating KoboldCpp and Retrieval-Augmented Generation (RAG) concepts to guide developers towards relevant repositories, debugging steps, and operational documentation
- Assisting in the coordination and management of external vendors for the tech refresh of legacy applications

Banking Computer Services - NETS Group | Senior Software Engineer | Aug 2023 - Oct 2024

- Did a tech refresh of a production dashboard, enhancing its user interface and performance by reducing querying time
- Contributed to development of applications deployed on AWS
- Assisted in creating scripts to aid in L2's investigations for tickets

DXC Technology | Software Developer II | Oct 2022 - Aug 2023

- Pioneered the start of the project by assisting in the solutioning and design activities
- Developed the project's core rules engine from scratch and held internal knowledge transfer for all developers involved in the project
- Developed foundational services that are critical to the integration of the different modules in the project

DXC Technology | Software Developer I | Aug 2021 - Oct 2022

- Lead for Service Requests, in charge of coordinating the team and ensuring delivery of features within timeline
- SME for IBM Rules Designer, in charge of coming up with documentation and teaching new joiners who are unfamiliar with it
- Took on additional L3 support role on top of development work, with 100% SLA compliance rate

AsiaPac Distribution Pte Ltd | RPA Developer | Oct 2019 - Dec 2020

- Automated repetitive internal business processes using Automation Anywhere, reducing manual overhead

CERTIFICATIONS

- AWS Certified Developer - Associate (DVA - C02)
- AWS Certified Solutions Architect - Associate (SAA - C03)
- Azure Developer Associate (AZ-204)

EDUCATION

University of London

Sept 2018– May 2021

- BSc Computing & Information Systems, Honours II Upper
- FYP: Android application utilising Tensorflow and Kotlin for pose estimation
